

Community Choice Aggregation

Ohio law allows for local communities to join their residents together to shop for electricity and natural gas as a group, thereby gaining "bulk buying power" to solicit the lowest price for the group's electricity and natural gas supply needs.

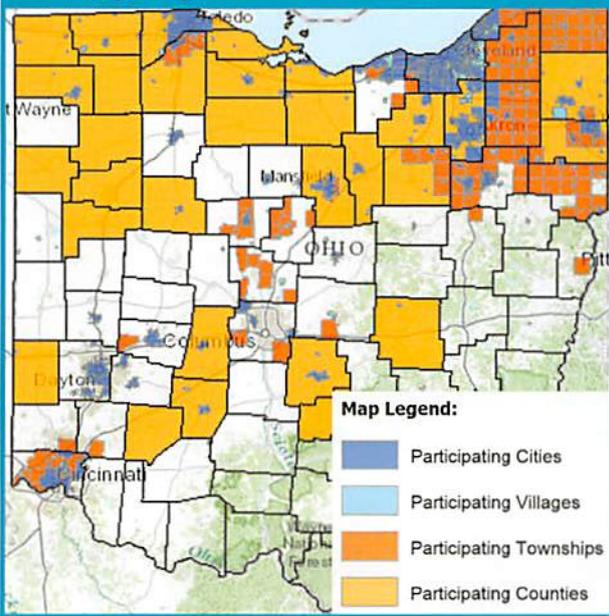

A "YES" vote allows for your community to join **many** others (see map below) and participate in a program that will secure lower electricity and natural gas rates for all eligible residents in your community.

Vote "YES" with Confidence

The aggregation process is monitored by the Public Utilities Commission of Ohio and is subject to strict compliance and consumer-safeguard rules.

Electricity Offers Comparison

Electricity Offered By	Fixed Term	Rate
DP&L Price to Compare	N/A	7.49
2016 Aggregation Rate	36 months	5.441
Constellation	36 months	7.25
Direct Energy	36 months	7.39
DPL Energy	24 months	6.55
IGS Energy	12 months	6.35

Electricity Offered By	Fixed Term	Annual \$ Savings
DP&L Price to Compare	N/A	N/A
2016 Aggregation Rate	36 months	\$205
Constellation	36 months	\$24
Direct Energy	36 months	\$10
DPL Energy	24 months	\$94
IGS Energy	12 months	\$114

Recent Community Choice Aggregation rates have been substantially lower than DP&L's 12 month historical Price to Compare.

A Community Choice Aggregation Rate of 5.441 cents per kilowatt-hour was secured in 2016 for 36 months, representing over 25% in savings.

This translates into more than \$200 of potential savings per year, for every participating household in the community!

Community Choice Aggregation has consistently delivered the lowest rates, over the longest term, from the most qualified competitive suppliers. Vote "YES" to start saving!

What You Need to Know About Community Choice Aggregation

If approved by the majority of voters, Community Choice Aggregation (CCA) allows your community to join its residents together to shop for electricity and natural gas as a group. YOU remain in complete control of your electricity and natural gas rates; **CCA simply allows your community to request suppliers to bid on the collective energy needs of the entire community.** If a great rate is offered, all eligible residents and small businesses will automatically be included in the program without charge, but will have the ability to opt-out at any time, and without penalty.

Important Facts About Aggregation

- Free to participate in the CCA program
- Aggregated customers enjoy "bulk buying power" that individual residents cannot achieve
- *Nothing changes* except the rate you pay for electricity and natural gas
- You will continue to call DP&L and Vectren or Dominion for any service or billing questions
- **You are in complete control**; you can opt-out of the CCA program at any time without penalty

What if I Have Already Chosen a Supplier?

If you have already selected a supplier on your own, you will not be automatically included in the Community Choice Aggregation Program. At the conclusion of your current contract, you may opt-in to the CCA program under the same terms and conditions as the other participants.

You can still vote "YES" to help your friends and neighbors, who have not yet chosen a supplier, save on their utility bills.
